

## GoAdmin 3.3 "No Live Calls" Problem

Written by ProDialers

---

After updating your GoAutoDial 3.0 CE to the GoAdmin 3.3, some users experience that although calls seem to be going fine in the Asterisk CLI, the agent screen (or the AGC) serve no live calls to the agent. If so, please check the following:

1. That you have [updated your Asterisk to 1.8](#)
2. That you have [updated ViciDial to 2.7](#)
