

Finding files larger than ... in Linux

Written by ProDialers

In order to locate any files larger than a certain size, please run the following command. The below example searches for all files larger than 500MB.

```
find / -size +500M
```

To display more details and sort the items in the list by size, run the following:

```
find / -type f -size +500M -exec du -h {} ; | sort -n
```
